Wherever gas is used, we are there

How to read the date of manufacture

on a Cavagna OPD valve

The marking can be found on the right side of the valve on a flat surface.

YYYWW

The first two numbers identify the **year** (for example, 26 = 2026)

The last two numbers identify the **week** (for example, 11 = week from March 9 to 15)

*Note: Valves manufactured before 2014 do not have a "**Y**" preceding the numbers*

⚠ NOTICE TO REFILLERS AND REFURBISHERS

We manufacture our OPD valves according to industry standards, including CGA S-1.1 which requires replacement or requalification of the pressure relief device (PRD) within 10 years after the date of manufacture.
